

Warm Up 5-19-08

Use reverse order of operations to solve these algebraic equations:

1.) $2a - 9 = 29$ $a = \underline{\hspace{2cm}}$

2.) $v/3 + 10 = 14$ $v = \underline{\hspace{2cm}}$

3.) $45 = 6d - 45$ $d = \underline{\hspace{2cm}}$
