

## Warm Up 1-14-08

In the class, there are 5 table groups with 3 people sitting at each table. Out of the 5 table groups, 3 of them get to go to the movies. From those 3 tables, 2 people from each table get to go to the movies. What fraction of people get to go to the movies?

- a.) Draw a picture of the problem.
- b.) Create a array to show the problem.
- c.) Write the problem as an equation using fractions.
