

Finding Slope

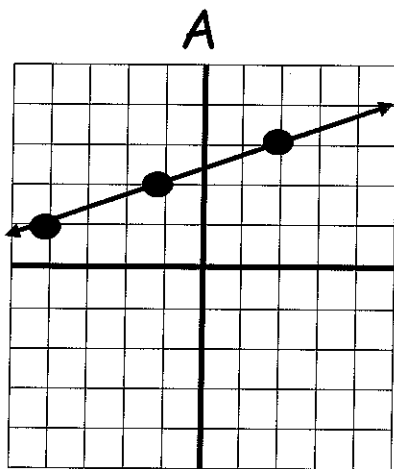

Name:

Period:

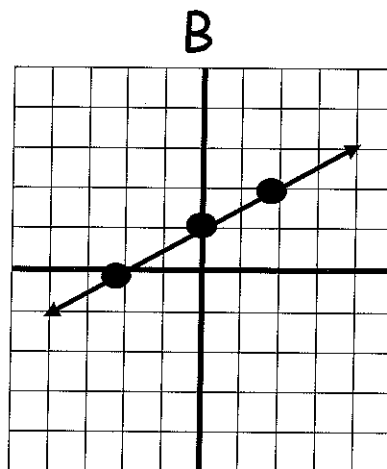

Date:

Using page 191, write definitions of slope, rise, run, positive slope and negative slope.

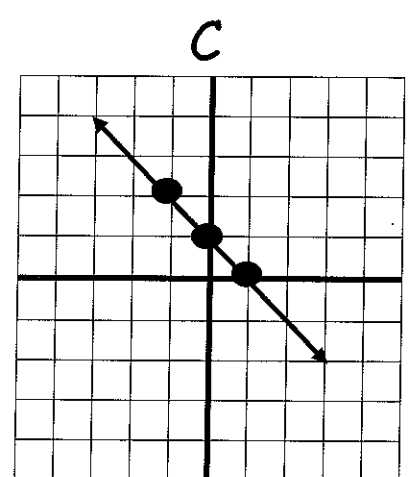

Can you discover how to determine the slope of a line? Study the graphs carefully and try to figure out how to determine the slope of a line.

The slope is 1 to 3 or $\frac{1}{3}$

The slope is 1 to 2 or $\frac{1}{2}$

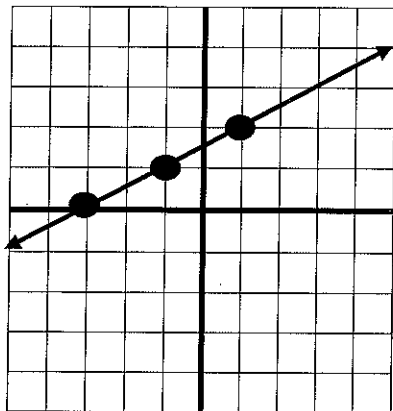

The slope is -1 to 1 or $\frac{-1}{1}$

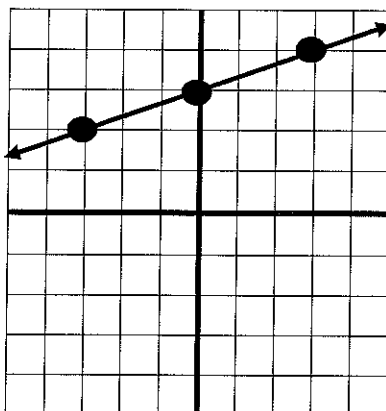

Explain how to determine the slope.

Find the slope of each line. Make sure to show work by writing the run and rise of each.
